

Step by Step Walk Through For Creative Colour **Illustrator**

1. Open or create document.

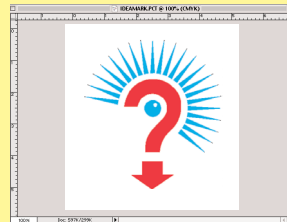

1. Select the selection tool from the tool pallet.
2. Select each section that you wish to colour.
3. Mix colour in colour pallet as per Creative Colour chart.

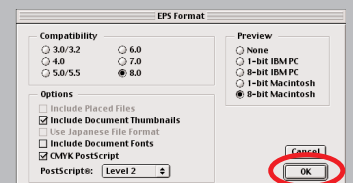

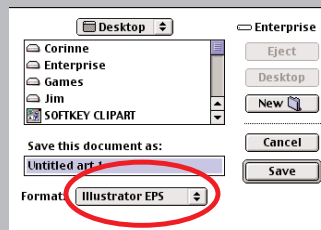

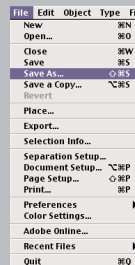

Example here is for colour #11.

1. Repeat process for each colour.
2. Make sure that all areas are correctly coloured.

1. Save file as an eps.

Things to note:

- Your file should be vector art either made in Illustrator or another vector art program such as FreeHand or CoreDRAW.
- Only the colour mixes on the Creative Colour Chart can be used under the Creative Colour program.
